## **DETAILED ACTION**

### ***General Status***

1. This is a Final Action on the Merits. Claims 1 – 16 are pending in the case

### ***Specification***

2. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or  
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if

Art Unit: 2832

the required "Sequence Listing" is not submitted as an electronic document on compact disc).

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 13, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurtz [US 5,087,803].

Kurtz discloses a switch [Figure 2] comprising:

- an outer housing [174, 184];
- an inner component [38] with lugs [Figures 2 and 6, 88 and 90];
- means operable [44 and 42] to provide a signal upon depression of the housing [184];
- resilient biasing means [192];
- means for varying spacing between the inner component and outer housing [Figure 2, 176 and 178];
- a base [26];
- an inner retaining member [180];
- an inner retaining member [23] with flange [186].

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kurtz [US 5,087,803].

Kurtz teaches substantially as claimed, but fails to describe the uses to which the switch may be put and does not specifically teach use of the switch as an item selection tool for a computer system. It is notoriously well known to use switches as an item selection tool for computer systems. Use of Kurtz's device would allow the computer to be used in conjunction with a hazardous environment [Column 1, lines 50-54]. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use of Kurt's device in order to provide a signal upon depression of the housing by engaging and disengaging the contacts [Abstract].

***Response to Arguments***

5. Applicant's arguments filed 04/08/03 have been fully considered but they are not persuasive for the following reasons:

- a. The rejections in the previous office action under 35 USC §112, second paragraph and drawing objection under 37CFR 1.83(a) are withdrawn.
- b. The Applicant has argued that Kurtz fails to teach "a force which biases the outer housing from the inner component...". The examiner respectfully disagrees. Kurtz reference discloses outer housing 174 (composed of elements 184, 194, and 198 with threads 178 on the element 174) and inner component 38 (composed of elements 180 and 34 with threads 176 on element 38). The rotation of element 184 causes the element to depress due to cam action which causes biasing of spring 192 between the inner component and the outer housing (column 7, lines 61+). Also, due to engagement of threads 178 and 176 the distance between the inner component and the outer housing can be changed thereby varying the biasing force between the inner component and the outer housing.

#### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2832

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
